

When I Come To You

Jonny Lang

When I'm all alone
When I'm feelin' blue
No one understands me, baby
Nobody but you
Through all the sleepless nights
And the rainy day till' the sun is nowhere in view
The only way I make it through is when I come to you

And in my darkest hour, when the midnight shadows fall
Baby you got the power to make the angels come to call
I just hold you in my arms
And let the music in my heart play the whole night through
When I come to you, I felt so brand new, when I come to you

When I come to you, you make it all right again
When I come to you, you keep me from the howlin' wind
and I feel brand new, when I come to you
