

Hellfire

Jørn Lande

Before me now
I see a dying planet
Captured souls
With microchips implanted
When warning came
You stayed the same
When warning came
You stayed the same
I am crumbling over the obstacles
Nothing left to entertain
The smell of burning corpses
A new world domain
I saw them coming
A world from a far
I saw them coming
From a distant star
I will break out from this madness
There is nothing here but sadness
I'm burning in the hellfire
Hellfire
I will break out from this madness
There's nothing here but sadness
I'm dancing in the hellfire
Hellfire

Before me now I see a future
A future black
Oh... come and save me!
I'm under soul attack
A time of changes
It rearranges
A time of changes
Oh... I will break out from this madness
There's nothing here but sadness
I'm burning in the hellfire
Hellfire
I will break out of this madness
There's nothing here but sadness
I'm turning in the hellfire
Hellfire

I will break out from this madness
There's nothing here but sadness
I'm burning in the hellfire
Hellfire
I will break out from this madness... yeah
I'm dancing in the hellfire
Hellfire
There must be a way
I'm waiting
Waiting for the day
Hellfire
Hellfire
Burns higher
Hellfire
Higher
Higher

Only blood remains
There is nothing more to gain
Hellfire
