

# We Brought the Angels Down

Jørn Lande

Maker of time where did you run to  
Inside the wheel i cry for you..you  
Sore form the sins that make me burn  
Circle of fate will keep turning

Is it far...I've got to know  
Fading faster soon my journey will be over  
There's a place beyond the sun  
We must find the reason  
Why we can't stop running

We brought the angels down  
And made them evil  
There's no religion without crime...no  
Are we the last in time, the darkest flower  
I spread my leaves into the night sky

Warrior of death who do you turn to  
Inside you feel it scream for you...they knew  
Haunted by pain it makes you burn  
The ghost of your mind will return...ooh

Is it far?... I've got to know  
Fading faster soon my journey will be over  
There's a place beyond the sun  
We must find the reason  
Why we can't stop running

We brought the angels down  
And made them evil  
There's no religion without crime...no  
Are we the last in time, the darkest flower  
I grow my leaves into the night sky

Take me far...I've got to go  
Moving faster as my heart is getting older  
There's a place beyond the sun  
We must find the reason  
Why we can't stop running

We brought the angels down....

We brought the angels down  
And made them evil  
There's no religion without crime...no  
Are we the last in time, the darkest flower  
I grow my leaves into the night sky  
Oh..and it's perfect dark...  
in my lonely heart... oh yeah
