

# Fire To The Sun

Jorn

Here comes a storm of ice and fire  
Hellborn demon with a strong desire  
Heavens devil on this road to hell  
A fallen angel in a wishing well

I'm everything and everything is me  
I find myself in all I see  
Hard to accept when wrong is right  
Love and hate close like day and night

Built my ambition since I came to rock  
I always had to be the master of the flock

Not sure I'm ever coming back  
No time to waste so I attack  
I'll be the fastest on the track  
Cause I'm the leader of the pack  
Turn up the flame until it's done  
I'm coming so you better run  
Shooting like a lazer gun  
I set fire to the sun

She was a fast crate engine ready to go  
He was a 460 big block overload  
Yes, they had one thing in common deep in the soul  
It was the hunger for love and rock 'n roll

Back alley creatures of the neon jungle  
Wall street kings and queens losing numbers  
One more down as the business crumbles  
Still we roll the dice

The dark pressure on the brain is such a heavy load  
World is a thermometer destined to explode

There'll be crying in the shame  
A lot of trouble from the blame  
It's the nature of the game  
We learn to burn in the rain

All the songs I have sung  
And every dream that I have spun  
Till the end when all is done  
I'll set fire to the sun... yeah

You better stay out of my way or I'll run you over

I'll be the stone that doesn't crack  
I'm always ready to attack  
Fastest train on the track  
A leader wolf and his pack

You'll sing the songs that I have sung  
And spin the wheels I have spun  
Turn up the flame until it's done  
And set fire to the sun

Ooh maybe we will never know  
What comes after when we go  
But there's one thing that I know  
I'll set fire to the show

Some say I was a big mistake, I say I did it my own way  
All you trolls of today, I set fire to your play  
I set fire to the sun
