

# Electric Skies

Josh Abbott Band

Electric skies fill up the night  
They always light up the ground  
Raindrops dance across my face  
They never bring me down

Cuz ive been doing some thinking  
Know this much is true  
Love to watch the rain fall down with you

Thunder rolls across the air  
It puts me right to sleep  
I hope that it gets cold this fall  
And puts snow on the street

Cuz ive been doing some thinking  
Know this much is true  
Love to watch the snow fall down with you

Don't you dare go outside tonight  
Lookup and not see me  
Cuz every time I go out  
You're all I see

A million stars look down tonight  
There all shine down on me  
I think if I just saw one fly by  
I'd know what my wish would be

Cuz I've been doing some thinking  
Know this much is true  
I'd love to watch the stars fall down tonight with you  
I'd love to watch the rain fall down with you
