

# I Still Love You (Now and Then)

Josh Ritter

They all say that you're doing well  
Living down in Arkansas  
You got a family now they tell  
The old days never call to ya

Me I'm working for the man  
But he ain't got the best of me  
I have friends and I have plans  
And someone's got the rest of me

But I still love you now and then  
I love you now and then when I think of ya  
I still love you now and then  
I love you now and then  
I still love you now and then when I think of ya

Said a broken heart don't leave a scar  
I keep it to myself and I  
I keep my head up though it's hard  
All these things take a little time

'Cause I still love you now and then  
I love you now and then when I think of ya  
I still love you now and then  
I love you now and then  
And I still love you now and then when I think of ya

Never mind all that they say  
How are you these days  
I laugh and tell them that I'm doing fine  
It's gonna take time  
It's gonna take more than time

I wish for you the very best  
You always were the best of us  
There was you and then the rest  
And that's the girl I'm thinking of

'Cause I still love you now and then  
I love you now and then when I think of ya  
I still love you now and then  
I love you now and then  
And I still love you now and then when I think of ya

I still love you now and then  
When her fingers brush my skin  
When the night falls over all  
Of everything that's been  
And everything we were  
And cannot be again  
I still love you now and then when I think of ya  
I think of ya

I think of ya
