

Stay the Night

Jukebox the Ghost

No, we're not getting any younger
I'm coming over, I'm coming over
Stare at the napkin with your number
I'm coming over, I'm coming over

Walking, draw close
Before we know
We're kissing goodbye
But I really wanna stay the night, night, night
But I really wanna stay the night, night with you
And I think you really want me too

I'm singing Journey on the highway
I'm still believing, I'm still believing
That I'll wake up beside you one day
I'm still believing, I'm still believing

Walking, draw close
Before we know
We're kissing goodbye
But I really wanna stay the night, night, night
But I really wanna stay the night, night with you
And I think you really want me too

Oohhh
How I really want you (how I really want you, baby)
Ooh, I really want...
Night, night, night
But I really wanna stay the night, night with you
But I really wanna stay the night, night, night
But I really wanna stay the night, night with you
And I think you really want me too

And I think you really want me too
