

# Glass

Julian Casablancas

I don't believe it  
I won't believe in it  
I'm not sad  
I understand that's how it goes

Take it easy  
There's no time to be mad  
That's their job  
Blood on their teeth  
Death on their mind

Pretty baby  
Please just get out of the way  
We're insane

Eyes will follow you  
Weapons can't break through  
Tears will swallow you  
And you'll be seen right through

Bulletproof glass  
Bulletproof glass  
Bulletproof -- you won't have any trouble now  
But who knows?  
But who knows?

Please don't deceive me  
I'm just so easily fooled  
But there's some things  
They do not want the answers to

Don't wanna bring all that up  
But they keep leaving it out  
What'd ya do?

We'll just let it be  
Until they all leave

Bulletproof glass  
Bulletproof glass  
Bulletproof -- you won't have any trouble now  
But who knows?  
But who knows?

If you wanna know somebody  
Might take a quick look at  
Their best friends

Diamonds are hers  
A dog is his

You can lie to yourself  
But don't lie to me  
It's what they want

Dominance and loyalty  
Romance and security

Stay behind
