

My Protegee

Juliana Hatfield

You can touch her if you want
You can rub her if you want
She won't struggle if you want
She'll act like you turn her on

She knows just what to say
She's my protégée
So much love

There's money everywhere
So laugh at their stupid jokes
She can't live on air
But no one has to know

And if you binge, you gotta purge
She could rule the world
So much love
My protégée
My protégée

Young hearts
Understand
The future
Is in my hands

My protégée
My protégée
I taught her everything
She's gonna rock you
