

# I Couldn't Make You Love Me

Julie Roberts

Don't you worry, don't be afraid  
I can hear those voices, here inside  
That never seem to fade  
But it's gonna be  
A little hard for me  
To tell this heart of mine  
To listen this time

I have climbed the mountain  
No one climbed before me  
Took life in my two hands  
And written my own story  
I have dreamed a future  
That I made reality  
But there's one thing that  
I could never do  
I couldn't make you love me

I have learned I can stand alone  
When the wind has turned against me  
I still made my way home  
Every bridge I crossed  
And didn't mind the cost  
Was nothing like the fight  
That I'm facing tonight

I have climbed the mountain  
No one climbed before me  
I took life in my two hands  
And written my own story  
I have dreamed a future  
That I made reality  
But there's one thing that  
I could never do  
I couldn't make you love me

I thought impossible was just a word  
But now impossible is stopping  
All these tears that cloud my eyes  
As I'm reliving your goodbye  
One more time

I have climbed the mountain  
No one climbed before me  
Took life in my two hands  
And written my own story  
I have dreamed a future  
That I made reality  
But there's one thing that  
I could never do  
I couldn't make you love me
