

Running across that line
Running across that sound
You say over and over again

I lost you on that night
I lost you in that sound
We say over and over again
My love we said never waste a man
Never lie, never stop this overload season
My love we said
The loss is in our heads
The loss is in our minds
The lies lies lies
Playing along the light
Riding the edge of sound
She said over and over again
I'll follow you through the night
I'll follow you as you drown
She said over and over again
Love starts bleeding through the open door
as the light hits streaming on the distant shore
