

What I Do

Junior Doctor

The beat is gonna move
Your lips are what I wanna taste and your hips
Are calling me out on the floor
Girl we can't ignore this attraction

You're all up on me when they dim the lights
And tonight this feels right
So baby let's close our eyes
As we fade into the distraction

You're pulling me inside your body
I lie to you while you lie on me
You're inside my head
While it's in you
And baby I don't mean to confuse
You but this is just what I do

The beat is gonna move
Your lips are what I wanna taste and girl your hips
Are calling me out on the floor
Girl we can't ignore this attraction

Consider this your warning girl
I'm sounding the alarm
Cause the truth is
I mean you no harm

Consider this your warning girl
We can get it on
But know this
As soon as I'm done I'm gone
Gone
