

## Raised On Love

Justin Hayward

We won't be sleeping on our own tonight  
The star that guides us  
Is still shining bright  
And in the darkness  
There will always be a light  
I think I know now  
What is wrong and what is right  
'cos I was raised on love  
Yes I was raised on love  
And I thank heaven above  
For being raised on love.

Seems like venus was around my sign  
She must have been there  
In that house of mine  
And when she tells me  
That I'm on the right track  
When she tells me  
There's no looking back  
'cos I was raised on love  
Yes I was raised on love  
And I thank heaven above  
For being raised on love
