

# True Blood

Justin Timberlake

[Verse 1]

Red was the color of her eyes  
She put me in a meditation state  
The skin is white so white  
The night will have no expiration date  
Black is the color of the night  
And it's time for me get her body waste  
There's just something 'bout the demon that she brings out of me  
When we raise hell I can't stay away

[Bridge]

Aw, give it to me now  
Something just got you fiendin'  
Once she starts to evoke the spirit  
It comes at night when you're a dreaming

[Hook]

I think she's got that true blood  
Every time your 'round I can smell it in you  
She's got that true blood  
I come around and raise the hell out of you  
It's that demon in me that's got me screaming  
Make me wanna build a coffin for two  
She's got that true blood  
But baby I just do it for the thrill out of you

[Verse 2]

Now I feel my fever on the rise  
And the bones in my body start to quake  
Straight up from my tongue and my mind  
She controls me when I don't want to escape  
All the ones gotta try  
But they have been here by no mistake  
But she got a bite of my type  
She told me that she find the perfect way

[Bridge]

[Hook]

[Breakdown]

Her pheromones invaded my senses  
I saw her silhouette  
You're perfection, I'm mad I don't wanna leave  
Those girls wanna burn with me but they don't hold a candle

[Hook]
