

Let it grow

K's Choice

The blue above was waiting for a cloud
We fell in love and then we fell back out
While the ground was shaking when you called my name

We are all in this together so
Let shower just a little light
And let it grow

The empty house is waiting for a crowd
Now all is quiet but it's sound so loud
While the ground was shaking when you called my name

We are all in this, together so
Let shower just a little light
And let it grow

And we're here together so
Let shower light before we go
And we're all

In this together so
Let shower light before we go
Let it grow
Let it grow
