

# Ergonomics

Kajagoogoo

I buy things that are made to measure  
I like to throw 'em around, hit it  
Opener cullender throw the handle  
They come together and they make a big sound  
They come together and they make a big sound

Variety is the proposition  
Modern is out of date, hit it  
Neatest fitting comfy handles  
They come together and they make a big sound  
They come together and they make a big sound

All across the land  
It's made for the hand  
All across the land  
It's made for the hand

Mould and patterns add to interest  
Hand made on a hand made face, hit it  
Made and curved by ergonomics  
They come together and they make a big sound  
They come together and they make a big sound

All across the land  
It's made for the hand  
All across the land  
It's made for the hand

Ergonomics are efficient  
Make you think in symmetry  
Use the manual it's tradition  
Made to aid you instantly

All across the land  
It's made for the hand  
All across the land  
It's made for the hand
