

# Before You Let Me Go

Kane

Stay tonight  
Let me hold you like I never did before  
Take my arms  
And let me hold you like I never did before  
And I should have tried just to talk about this  
Waiting, ending  
I should have tried just to let you know that I'm  
Still here  
So before you let me go...  
Take my hands  
Let me touch you like I never did before  
Take my heart and let me love you  
Like I never did before  
Like I never did before  
And I should have tried just to talk about it  
Waiting, ending  
I should have tried just to let you know  
That I'm still here  
But we waste it every time  
Now my heart is on the line  
And we see ourselves no more  
When we're closing every door  
It's so much harder than before  
So before you let me go  
Before you let me go.....  
Save the dance and let me spin you  
Till your world is turning round and round  
Round and round, round and round  
Save the chance and let me show you  
Just like you need a little more  
Just like you need a little more  
And I should have tried just to talk about it  
Waiting, ending  
I should have tried just to let you know  
That I'm still here  
But we waste it every time  
Now my heart is on the line  
Until we see ourselves no more  
When we're closing every door  
It's so much harder than before  
So much harder than before  
So before you let me go...  
Before you let me go...  
But we waste it every time  
Now my heart is on the line  
Until we see ourselves no more  
When we're closing every door  
It's so much harder than before  
So much harder than before  
But we waste it every time  
Now my heart is on the line  
And now we bruise with every step
