

Nice To Know

Kari Kimmel

You tell me that there's nothing to fear
You tell me not to worry you'll always be here
You tell me that it won't ever change
That love like this never fades, yeah

After all the good times and bad, mmh
After all the love it's so hard to look back
There's something that we always will feel
Something stronger has brought us here

But I still love you like that
Baby I still wish that our love, it coulda last
If I can't have you no it won't get me down
It's just nice to know you're around

La la la la la
La la la la la

You say that you can't leave me for good
You'll always be a part of me, that is understood
No one else can touch me the same
No one knows me this way

Oh and I still love you like that
Baby I still wish that our love, it coulda last
If I can't have you no it won't get me down
It's just nice to know you're around

Well I'll be thinking of you every day
And wonder where you are
Yes and I'll be hoping everything is okay
But we'll never be too far

La la la la la
La la la la la

Oh and I still love you like that
Baby I still wish that our love, it coulda last
If I can't have you no it won't get me down
It's just nice to know you're around

Still love you like that, like that, yeah
Baby I still wish you that our love, it coulda last
If I can't have you no it won't get me down
It's just nice to know you're around

La la la la la
La la la la la
La la la la la
La la la la la
