## **Everything is Right**

You've been thinking, nothing happens by mistake If doors are closing, doors will open in their place Still you worry what the future's got in store Now you're older, life is colder than before So you say...

Oh, oh oh oh, oh oh oh - here we go Oh, oh oh oh, oh oh oh - here we go

And I say... Just stop, see the stars align Slow down, take your time 'cause Everything is right, everything is right Just stop, let yourself be free Slow down, can't you see that Everything is right, everything is right

Take direction, there's no compass in the game Point the needle, no two people live the same Still you worry, don't you read between the lines Just relax now, life is random by design And you say...

Oh, oh oh oh, oh oh oh - there we go Oh, oh oh oh, oh oh oh - there we go

Everything I need, is here inside of me Be what it will be Victory or fall, I embrace it all Ending up on top Karmin
