

# One Night Between Friends

Katie Armiger

Black holes and amnesia  
No one's ever gonna know or believe us  
I'm a good girl but I can't get you out of my head  
I won't tell if you won't  
But we won't know if we don't  
Give it a go  
Let this kiss say what needs to be said  
No looking back  
Baby, no regrets

What's one night between friends?  
Come on let's try, you can stop pretending  
I can't promise this is gonna be right  
But what's one night, what's one night between friends

Box wine, cold pizza  
Sounds like a great time, don't you think ya  
Want to stop by maybe stay for a little while  
Slow dance to the radio  
Romance, we can take it slow  
Pull me in tight let the moonlight shine  
Don't think about anything but us tonight

What's one night between friends?  
Come on let's try, you can stop pretending  
I can't promise this is gonna be right  
But what's one night, what's one night between friends

Don't wanna be just friends  
Don't know how half the story ends  
But what's one night between friends

What's one night between friends?  
Come on let's try, you can stop pretending.  
Can't promise this is gonna be right.  
What's one night?

What's one night between friends?  
Come on let's try, you can stop pretending.  
Can't promise can't promise this will be right.  
But what's one night, what's one night, what's one night?  
Between friends
