

# First Blood

Kavinsky

Let's go

As the lightening strikes, you have to start the fight  
You're shiftin'gears, you're punishing, you step through the night  
I know you, I know you

Know that there's a thunder deep inside of you  
It makes you think it's all a dream, it cannot be true  
We'll inhale, we'll inhale

Just follow me and go  
Just follow me and go

It's not known what we'll do, they can break your heart  
Without love, without my desire  
I see a thing that is not real but I'm still alive  
I know you, I know you

And when the power comes from deep within  
I never ran a story that gone never begin  
We'll inhale, we'll inhale

Just follow me and go  
Just follow me and go

This time know when we'll do  
They can break your heart again

That's enough
