

## About You Without You

Kayak

About you, without you, my plans were made I'm driving, conniving, well worth the wait I simply can't afford to let you have your way So I must learn to do without you

About you, without you, you stand accused High treason, no reason, I'm quite amused I came, I saw, I conquered everything in sight I had to learn to do without you

Without you, without you, about you

About you, without you, the deal was done What matters, in tatters, I'm moving on Can't bare you have a say in anything at all I always had to do without you

Without you, without you, about you

Now I won't be ignored, I've come to the fore I'm just making sure you're on my side You're right to suggest, it's what I do best And let your request, I'll give you Instant pleasure, easy, easy (The bigger the lie the easier to justify) It will please me, please me But on my terms, without you

About you, without you, I'll do my tricks Achieving, deceiving, good politics Because you didn't stop me while you had the chance Now I can't keep on doing without you

Without you, without you, about you Without you, without you, about you
