

Feels Good To Be Real

Kazzer

You got your brand names
looks to kill
seems that everything is plastic and nothing is real

Where money talks and real Kats walk
it's so bizarre

You can work twice as hard and go half as far

The truth hurts and it only gets worse you wouldn't
tell me what I'm worth people don't always get what
they deserve

I get down roll up my sleeves for every dollar when
others come fake it makes me work harder, like
Dawn, I ain't goin out like that
feels good to be real
lovin' all these fake shit's trash, can't look like
that
feels good to be real

Promises, who will sell you
love to hate feels good to be real

Goet piece of mind, but those minds are closed
can't ignore the evidence when the world seems cold

Got lies and deception, all for protection
check your prescription fuel my addictions
buy into the hype avoid the consequences when the
fakeness

Breeds weed out the misfits
I try no to blink let the river run dry
Just step right up and look death in the eye, like
Mistaken and faded and landslide over rated
swallowed your changin its hollow don't you hate.
