

# Calm Before The Storm

Keel

Here I am again starin' out the window  
As the miles roll on  
It seems like such a long, long time  
Since it's been so dark before the dawn

In every reflection  
It's you that I see  
When night comes down  
I'll be back in town  
So give your love to me

In the calm before the storm  
I'll be there to keep you warm  
(In the calm before the storm)  
In the calm before the storm

And out there in the spotlight's shining heat  
As I stare out at endless faces  
It's like the eye of a hurricane  
And I'm blown away to distant places

In every reflection  
You're all that I I see  
When night comes down  
I'll be back in town  
So save your lovin' for me

In the calm before the storm  
I'll be there to keep you warm  
(In the calm before the storm)  
In the calm before the storm

Oh baby

Here I am again starin' out the window  
As the miles roll on  
It's like the eye of a hurricane  
And it's always dark before the dawn

In every reflection  
It's you that I see  
When night comes down  
I'll be back in town  
So give your love to me baby, yeah

In the calm before the storm  
I'll be there to keep you warm  
(In the calm before the storm)  
In the calm before the storm  
(In the calm before the storm)  
In the calm before the storm
