

# The Final Frontier

Keel

The times are changin' for you and I  
We seek our future in the sky  
On metal wings our race will fly  
To conquer space and time

We'll face our destiny  
On The Final Frontier  
Beyond this galaxy  
Out on The Final Frontier  
On The Final Frontier  
It was meant to be  
Out on The Final Frontier

We've watched the stars since time began  
Gone to the moon and back again  
And somewhere out there lies the fate of man  
To distant worlds we extend out hands

To The Final Frontier  
We'll face our destiny  
Out on The Final Frontier  
We're the next pioneers  
On strange new worlds  
Of The Final Frontier

Sailing past the speed of light  
Throughout the vast eternal night  
Beyond the farthest star  
We're taking flight
