

# Tell Your Mama

Kehlani

It's so easy to become caught up in your own life  
Filled with all of your own problems, can't even sleep at night  
Everyday it's like a new problem arrives  
Need to ground yourself, can't afford to lose your mind  
If you wanna know the secret, if you want the best advice  
Come and take a listen  
Fall in love with what you find

Go and tell your mama you love her, go and tell your mama you love her  
Without her you could not love another, without her you could not love another  
Go and tell your mama you love her

Everything she did in the past, you knew it already happened  
No use to every time you see her you get to snappin'  
She's constantly apologizing for the things that she has done  
But what you must remember is those very first 9 months  
Let me let you in on a secret, if you want all this advice  
Come and take a listen, you fall in love with what you find

Go and tell your peoples you love em, go and tell your peoples you love em  
And thank them cause without em you're nothing, and thank em cause without em you're nothing  
Go and tell your mama you love her  
Go and tell your daddy you love him  
Now go and tell your brother you love em  
Now go and tell your sister you love em  
Now go and tell your cousins you love em  
Now go and tell your homies you love em  
Now go and tell your baby you love em  
You tell em, you say baby I love you
