

Your Body

Keith Urban

All the burnin' lights
Go rushin' by
I'm drivin' like a wild man outta the city
Gotta leave the madness behind
This jungle world gets so insane
It's a damned if you do
Damned if you don't kinda deal
In this crazy game

Shinin' in the darkness
Brighter than the sun
You fall into me
And we are one

And everything in the world is right
Stars align whenever my body
Is touching your body
And when I got your skin on mine
Fear gives way to heaven inside me
Whenever my body is touching your body

Your slight of hand
And your fire lips
Like a man with a habit
All I know's I gotta have it
Yeah, the magic in your fingertips
The things you do
And the love we make
Underneath the covers
You carry me away

And everything in the world is right
Stars align whenever my body
Is touching your body
And when I got your skin on mine
Fear gives way to heaven inside me
Whenever my body is touching your body

They say, nothing lasts forever
We make that so untrue
When forever's come and gone
I'll still be holding on to you

And everything in the world is right
Stars align whenever my body
Is touching your body
And when I got your skin on mine
Fear gives way to heaven inside me
Whenever my body is touching your body
