

# Burn the Sky

Keldian

Preemptive, conclusive - Master of Heaven and Earth  
Extensive, exclusive - There's no escaping my reach

I'll prosper, I'll conquer - All of your heroes are dead  
It's my time, it's high time - To be outbound, to rule the world

Heavens fall when we burn the sky - We are heading out, you're the sacrifice  
End the space race and burn the sky - And you will never make it out of here alive

Abundant, redundant - All I can think of will be  
Eternal, betrayal - All of our worlds will belong to me

Heavens fall when we burn the sky - We are heading out, you're the sacrifice  
End the space race and burn the sky - And you will never make it out of here alive

I have, you have not  
I have, you have not  
I have, you have not  
I have, you have not

I have, you have not  
I have, you have not  
I have, you have not  
I have, you have not

"We need to maintain nuclear strategic superiority...  
Fight and win multiple, simultaneous wars ... control cyberspace...  
Create space forces with the mission of space control."  
- Project for the New American Century, 2000

Heavens fall when we burn the sky - We are heading out, you're the sacrifice  
End the space race and burn the sky - And you will never make it out of here alive
