

# Nightfall

Keldian

darkness calls me, beckoning me  
in the failing light I dread the night  
out beyond the shadow, I strain to see  
to the other side, to the other me

darkness kills the light  
we fall, nightfall  
you are not alone in the fight  
night falls on us all

my racing heart and my skin of ice  
and my pitch black thoughts shut out the light  
no time to live and no place to be  
this vertigo is drowning me

darkness kills the light  
we fall, nightfall  
you are not alone in the fight  
night falls on us all, night falls on us all

darkness calls me, beckoning me  
I defy the night and I conjure light  
out beyond the shadow, it's plain to see  
to the other side and the other me

darkness kills the light  
we fall, nightfall  
you are not alone in the fight  
night falls on us all, night falls on us all
