

Closer To Nowhere

Kellie Pickler

We can go somewhere where you gotta get all dressed up
Or throw on some jeans and go somewhere and get messed up
Gotta be something we can get into downtown
Oh one of them nights when the neon lights never go down

We can go someplace where there ain't nobody around us
Take a ride out there where the stars look a little more crowded
Come on now, tell me what you think about yea
We can go anywhere
As long as it's somewhere
A little closer to nowhere

We can park on a hill and roll it on down to the riverside
Sit and watch the moon shine on the water like a streetlight
We can top off the tank and head on down some highway
Or boy we can get just as lost here in this driveway

We can go someplace where there ain't nobody around us
Take a ride out there where the stars look a little more crowded
Come on now, tell me what you think about yea
We can go anywhere
As long as it's somewhere
A little closer to nowhere

No crowd, no traffic
Where all we're getting is radio static
Anywhere you wanna go
Anywhere, we're here alone

Someplace where the stars look a little more crowded
Come on now, tell me what you think about yea
We can go anywhere
As long as it's somewhere
A little closer to nowhere
A little closer to nowhere

We can go someplace where there ain't nobody around us
A little closer to nowhere
