Give Me a Reason

Ken Hensley

I was downtown drinking with the boys All of a sudden coming out of the noise One of my so-called friends About ruined the night

He told me you've been seen around Told me you've been playing the town Seemingly without respect For the fact that you're mine

If you think you're coming back to me You're adding insult to injury You better try your luck some other day

When you can give me a reason, give me a reason Give me a reason - a reason to stay Give me a reason to stay

The more I realise the more it hurts You're out there acting like some smalltown flirt Telling me you're spending your nights Dreaming of me

You're asking me to overlook
Asking me to let you off the hook
Well obviously that's not the way it's gonna be

You're so busy making up my mind
I'm gonna do it in my own sweet time
Come back baby when you've got
Something better to say
