

## It's up to You

Ken Hensley

Twisted images and broken promises  
One long crisis day after day  
Hidden secrets and empty words  
Without any truth to light the way  
Is that what love is

You won't stop trying but you can't stop crying  
You say you're looking but you still can't see  
You throw the cards and you read the stars  
But only love can make it what you want it to be  
Because you know what love is

It's up to you  
Only you can make it grow  
It's up to you  
Hold on tight, don't let it go, oh no!

You think you're somewhere but you're going nowhere  
It's all an illusion, or that's what you say  
There's always a risk in an affair of the heart  
If depends on the price you're prepared to pay  
I know what love is
