

Line 'Em Up

Kerser

Sparked spliff in the back of a spaceship
I'm used to it I'm a star this is greatness
Let me ride watch you gunna say you hate this
Then you see I'm in real life and don't say shit
Enough of basic let me hit em where it hurts
Shiv em with the verse and kers will sink em make their liver burst
I deliver words crazy till they're in a hearse
Still alive they didn't die but I prefer to injure first
Then hit em with the headshot
I wanna see the legs drop
My rapping is a weapon its like acid in your head it attacks you in a second
Know what happened do you reckon I'm the king of the game now
Fuck your opinion doesnt count cause you're losing and were winning
I'm cruising with a vision that is moving on a mission and you're trippin ju
st to listen
Always knew me as the sickest true?

Put em there you can line em up
We can tell that they're biting us
We don't care cause were high enough
So we light it up come get high with us

Put em there you can line em up
We can tell that they're biting us
We don't care cause were high enough
So we light it up come get high with us

I never cared if they were taking offence rates
I made sure it ain't a name you forget wait
I ain't finished stack em up on my plate
I stumble the rappers afraid put em back in there place ashamed
I had to keep it up
Thinking back when I said "always loved this heaps"
I never rap for a trend
I was using the pens as a drum smashing my test
I got some talent and skills I couldn't graf with my friends
I was too busy dropping styles that I could run with
Everytime we drop a track these rappers couldn't fuck with
I'm standing proud and they falling down with one hit
Iv been around with every noun down when the drum hits clown on the fuckwits
I takeover what we original innovators we take what we want
You can face what we got
See you're long gone we the brothers we backing you know the bonds strong

Put em there you can line em up
We can tell that they're biting us
We don't care cause were high enough
So we light it up come get high with us
Put em there you can line em up
We can tell that they're biting us
We don't care cause were high enough
So we light it up come get high with us
