```
I got a wolf's mouth
And it suits me
I chew the sides out
With my sharp teeth
```

I cut my tongue off
I make my gums bleed
I scare the people
Who pay to see me
When I sing

and I saw white steam Above your blue face It made my hands hot It made my lips bake

and the sweat just makes my shirt stick To that scratch across my ribs That space where you fell from And I've never sewn up since

I'm trailing off again
I'm trailing off again
I'm trailing off again

And the strain just makes my face tick And it messes with my head A space you tore open Well I've had trouble sealin' it

I got a wolf's mouth
I got a wolf's mouth
