

Falling In Love With You

Kim Burrell

Love at first sight, you made me, saw what I would be
In my mothers womb you kept me until I became to be
Then one day You looked inside that dreadful cup and still saw me
And decided to die just to set me free

I'm in love with You, so in love with You
I'm in love with You, so in love with You
I'm in love with You, so in love with You
Everyday I'm falling in love with You

Falling in love with You, (oh, Yes I'm)
Falling in love with You, (I'm falling)
Falling in love with You, (more and more)
Falling in love with You, (oh yeah)
Falling in love with You, (everyday)
(Mmm falling), Falling

Oooh ooh, Sometimes I see my flaws
And my limitations like the girls conflicted in Jerusalem
Then I'm amazed of how you see me beyond my skin so deep I know looking within me
And see my heart, knowing from the start that I'll be right where you want me to be
Let me know from me exactly what you need and I'll be the girl to give you everything that you need

Following is easy, when is your first time, makes life seem, seem so certain
And the more I know ya, the more I need to love you, my heart my soul my mind you have it all before you
So please take control of me, not just a part of me, but all of me
I keep on falling more in love with you

Falling in love with You, (you took my heart in you)
Falling in love with You, (gave me a start in you)
Falling in love with You, (loved me so much)
Falling in love with You, (till I began to love myself)
Falling in love with You, (that's why I'm falling)
(So in Love with you) Falling (more and more and more and more and more)

Falling in love with You, (you never cease to amaze me)
Falling in love with You, (with the love that you give to me)
Falling in love with You, (I can always count on you)
Falling in love with You, (to be there for me)
Falling in love with You, (that's why my heart is for you)
(Because I know that You love me) Falling (and I really love you too)

You made me fall
You keep me happy
I'm so in Love
I'm in Love

More and more and more
More and more and more
