

We have no rights we have no say  
We vote on fixed elections  
And every four years we expect change  
We fight wars funded by the same investors  
And breathe in the depleted Uranium

They're crippling all of our hopes and dreams  
The liquidation of every business  
Their fixation on total control  
A designed collapse of the world's economy  
Sold to the dumbed down majority  
Never believing what's reality

The globalist banking cartel  
Creates the problem and sells the solution  
Televison and false flag attacks  
Sell the imperialistic foreign policy  
They've declared war on us

We have no rights we have no say  
We vote on fixed elections  
And every four years we expect change  
We fight wars funded by the same investors  
And breathe in the depleted Uranium

They're crippling all of our hopes and dreams  
The liquidation of every business  
Their fixation on total control  
A designed collapse of the world's economy

No trial no six amendment  
Freedom of speech as long as you have no opinion of your own  
Burn our books and scorch our land
