

... That's blood when I... close my eyes  
Boys and girls, the Lord is the one who gives us new life and H  
e's doing...

Lonely, I slowly slip into a pool of gold  
She takes my hand and doesn't let go  
I feel it deep within my soul  
Her whisper resonates my bones

I'm slowly hit and I slowly drift away  
She's the type I carry by my side  
Keeps me balanced, keeps her talons in my thigh  
Reminds me of the damage of how I live my life  
Keeps my salary damaged, hanging from the line  
Her love's unlimited, she lays there playing Barry White  
Girl she plays me Barry White  
All night as we drift into the light

We just smoke and let days roll by (just roll by)  
We don't care where we're day or through night  
We just want to let things roll by (just roll by)  
We don't care where we're day or through night  
We just smoke and let days roll by (things roll by)  
We don't care where we're day or thru night  
We just want to let things roll by (things roll by)  
We just want to let things roll by (things roll by)  
We don't care where we're day or all night  
We just smoke and let things roll by  
We don't care
