

## Black and White

King Los

My whole world is black and white, black and white  
My whole world is black and white, black and white  
What you say now? What you say now?  
This whole world's your playground  
What you say now? What you say now?  
Get down or fucking lay down  
My whole world is black and white, black and white  
My whole world is black and white, black and white  
What you say now? What you say now?  
This whole world's your playground  
What you say now? What you say now?  
Get down or fucking lay down
