We got our brothers and sisters fightin everyday, over the World Trade Centers fallin down that September day, but who's to blame for that catastrophe? If his name is Bin Laden why the fuck is he free? How come we haven't caught the real villain in court, send his ass up the river with no sign of remorse? Because an eye for an eye is real easy to say, I'll tell you how I really felt for that bitch on that 9/11 day (fuck him) a September it's hard to remember, but I remember all the troops that were sent ta, Iraq after, Saddam Hussein, when we should've been huntin down the ones who really crashed those planes. Into the N.Y .C. skyline, but we failed, and now we in worst shit for high prices for oil, my blood runs red white and blue through and through but how can you trust a government that just lies to you?
