

With every breath I breathe I choose life for the children  
With every breath I breathe I choose a wife and good livin  
With every single breath that I ingest I am given  
A smidgen to make life-changin decisions, listen  
My mission with precision will position our children  
by the millions to start buildin our culture for the billions  
and trillions of people comin after us  
If they doubt, they won't be as fast as us  
Cause in our time we kick a new power rhyme  
We keep renewin your mind, cause soon you will find  
That every single breath that I breathe keeps us conscious  
Enough to perceive and achieve if you believe  
But oxygen comes from the trees  
Without air for four minutes forget it you catchin some Z's  
So which is really conscious, us or nature?  
Maybe the trees wish to elevate the paper  
And maybe this was just the fall  
To forget that nature thinks, we doin nothin at all  
And this is the way of the world  
The world meanin the conscious nature and the earth that swirls  
Like buffalo girls we go 'round the outside  
Kris is controversial but Kris never lied  
In the forest, the mountains and the hills I reside  
You gotta follow the purpose you feel inside

With every single breath I choose  
With every single breath I move  
With every single breath I prove  
With every single breath I use  
With every single breath I snooze  
With every single breath I cruise  
With every single breath I choose life  
Not strife  
Or strain, some like that I came, to rearrange the game  
Others blame and remain the same  
Same same, but me the plan is plain  
We gotta think more humane...
