

# I'm With You

Kutless

Here am I  
I've tried to live without You  
It's the reason that I feel so far away  
I understand  
You see everything I go through  
and listen to the broken words I pray

I know You hear me  
I know You're answering me saying

Fall in my arms and let me carry you carry you  
I know you and I, we can make it through make it through  
When crashing waves pull you down in the undertow  
Reach out your hand and I swear I won't let you go  
I'm with you tonight

All this time You've been walking here beside me  
Waiting for the day I'd call your name  
So Here am I walking through the darkest valley  
Shine down Your light so I can see

You know I'm weary  
I know You're calling out to me

Fall in my arms I will carry you  
I know you and I will make it through  
All who need rest all who are lonely  
Come to me now and just let it go
