

Overcome

Kutless

You can't see a way, then a mountain moves,
Skies are lonely gray, then the sun breaks through,
When your darkest hour surrenders to the dawn.

No where left to turn, but the sea will part,
Running out of hope, still He holds your heart,
And He won't let go, He's with you through it all.

His love will overcome, overcome,
His love has already won, already won.

Will you take a stand, and a step of faith,
Will you trust the hands, that calm the waves,
You don't have to ever be afraid, He is with you through it all
.

His love will overcome, overcome,
His love has already won, already won.

I know that His love will overcome, whoa His love will overcome
,
I know that His love will overcome, yeah His love will overcome
.

Deep and wide an endless tide from age to age,
Stronger than whatever we will face.

I know that His love will overcome, whoa His love will overcome
,
We know that the war's already won, yeah His love will overcome
.

His love will overcome, overcome,
His love has already won, already won.

I know that His love will overcome, whoa His love will overcome
,
We know that the war's already won, yeah His love will overcome
.
