## **Push Me Away**

## Kutless

You tell me it's nothing but I see it's something in your eyes A fear is there You say you don't need me, don't try to deceive me By pulling the wool over my eyes

There's nothing wrong with needing help sometimes What are friendships for Now please

Don't push me away condemn your pride Sometimes we all need a hand to get by Don't push me away condemn your pride When tears start to fall then with you I will cry

No one is perfect, it just isn't worth it to stand on your own Though fear is there
Don't be ashamed to ask me to help you
To deal with the thoughts, spinning your head

There's nothing wrong with needing help sometimes What are friendships for Now please

You can lean on me Stand by my side, we will fight We are much stronger as one
