

# Chemistry

Kyle Riabko

You're my woman  
And I'm your man  
There ain't nothing left to understand

You dial my number  
But you don't know why  
Love is playing with your virgin mind

Your knees grow weak baby  
You feel so numb  
You don't stop eating  
Cause I'm feed me some  
You fall down tired  
And you scream my name  
Cause I'm your woman  
Through your darken days

Welcome to our chemistry baby  
Finally you can feel like a lady  
Darlin, it's too good to explain  
Welcome to our chemistry baby

You wake up feeling  
Like a million dollar bills  
You try to concentrate, baby  
But you can't sit still

You tell your mother  
You tell all your friends  
That you and your lover are making love till the end

You blow my mind  
All the time  
And it feels so fine  
This love is making me high
