So, dance, let the music in your soul and maybe you can dance
Let the fire be your goal and maybe you can dance
Let the music in your soul and maybe you can dance
Let the fire be your goal and maybe you can dance
Let the music in your soul and maybe you can dance
Let the fire be your goal and you can dance

The gypsy moths dance and sing the night away
And hope the movement gives them life
They don't know they're a million miles away
From reality into ecstasy
The gypsy moths have seen the border line
Their bodies move just like the wind
Blown by fate like you and I must be
Into reality away from ecstasy

So dance, let the music in your soul and maybe you can dance
Let the fire be your goal and maybe you can dance
Let the music in your soul and maybe you can dance
Let the fire be your goal and maybe you can dance
Let the music in your soul and maybe you can dance
Let the fire be your goal and you can dance

Leave your body and your mind behind and free your soul so you can
Leave your body and your mind behind and free your soul so you can

The gypsy moths have seen the border line
Blown by fate like you and I must be
The gypsy moths dance the night away
They don't know that they're a million miles away
The gypsy moths have seen the border line
Blown by fate like you and I must be

In your soul and dance
