

A Pearl

Lacrimas Profundere

They, they took your breath
You look like hopeless mes but I
be with you
or did you think
That I will go away
When your blood is everywhere
No, I'm here to say

Come on lady, do it again
Be my ebony pearl and try forget what was
Just try to forget what was

We will together even on our knees
swear you be forever I beg you please hold on
I'm begging you to hold on

You, lie in my arms
I will try to keep you warm till then nothing harms
I hope that no
Goddess takes you away
Just wait for a short delay
And for you to say

Come on lady, do it again
Be my ebony pearl and try forget what was
Just try to forget what was

We will together even on our knees
swear you be forever I beg you please hold on
I'm begging you to hold on

Come on lady, do it again
Be my ebony pearl and try forget what was
Just try to forget what was

We will together even on our knees
swear you be forever I beg you please hold on
I'm begging you to hold on

Come on lady, do it again
Be my ebony pearl and try forget what was
Just try to forget what was

We will together even on our knees
swear you be forever I beg you please hold on
I'm begging you to hold on
