

Mixed Emotions

Ladyhawke

I said it was the phone when we made time
Oh no, you wanted me the first time
In my head and you hollered me a third time
Oh no, you followed for the ninth time

And you know I'd have left by now
And you know I'd have left by now
You call and you hear what you want to
'Cause your heart got me numb numb
'Cause your heart got me numb numb

You're giving mixed emotions
You're giving mixed emotions
I'm waiting on you
You're giving mixed emotions
And we can make it tonight
You're used to making me fight
You're just my lover tonight
And we can make it tonight

So come on, don't be coy, I'm a good time
We both get home at the same time
On a roller coaster down the road
Like a baller we will roll

And you know I'd have left by now
And you know I am glad by now
You call and you hear what you want to
'Cause your heart got me numb numb
'Cause your heart got me numb numb

You're giving mixed emotions
You're giving mixed emotions
I'm waiting on you
You're giving mixed emotions
And we can make it tonight
You're used to making me fight
You're just my lover tonight
And we can make it tonight

You're getting nowhere
You're getting nowhere fast
You're playing silent
All left unknown

I said it was the phone when we made time
Oh no, you wanted me the first time
In my head and you hollered me a third time
Oh no, you followed for the ninth time

You're giving mixed emotions
You're giving mixed emotions
I'm waiting on you
You're giving mixed emotions
You're giving mixed emotions
You're giving mixed emotions
I'm waiting on you

You're giving mixed emotions
