

Stop Whining

Lagwagon

Can't you see
We the people can make the choices
You and I must raise our voices
To build a future where we belong

Revoke oppression and right and wrong
But do you vote or do you only complain
Do you just carry on in vain
As your economy crashes,

Your country goes to war
The deficit
Their answer to tax the poor
But you may never know

What you refuse to learn
Do you work the system
Or do you get burned?
Do you ignore your abilities

Or your intellect?
Are you obsolete?
An easy out, you forget it all
But it's the hardest path

And you chase to follow
You wouldn't speak for yourself
And now you're spoken for
This is something you can not ignore

It's time
For you to notice
The things that die
With no more lies

You can't deny
You're always high
And you still bitch
Makes me sick

It makes me sick the way you always
Fuckin' bitch
I remember a time when I thought it wasn't fair
The scales of justice did impair

But with no darkness
There would never be light
There would never be light
Without injustice we'd never have a right
