

Run

Lapush

Day is young
Innocent and pale
Alone in the hall
I wait to take you there
Instead you run
With the eyes of a sullen girl
You came undone
And you left me here alone

You needed proof
I couldn't take it from the start
When you're stuck
Alone on the blvd
But I was in
I was inside true love
Race you home
But you left a broken heart

Don't you run and hide
It's only pride
I won't leave tonight
All that you've left behind
I want you to live scientist
I will be the one to teach you
All your faults all your flaws
I want to see the bright lights

This time don't pass me by
With a kiss a tear betrayed in the garden
This life will pass you by
Too many years have dried
Your guilty conscious heart

Don't you run and hide
It's only pride
I won't leave tonight
All that you've left behind
I want you to live scientist
I will be the one to teach you
All your faults all your flaws
I want to see the bright lights
