

# Black Widow

Last Tribe

Run away and hide for life  
Wouldn't save you from this deadly bride  
She smells your blood from miles away  
And haunt you down wherever you may hide

No one can resist her voice  
Fighting back in useless  
She wont listen if you pray

See her eyes and you know that she won't let you go  
She wants you to die she's the black widow  
Her look lets you know that she won't let you go  
She eats your heart out she's the black widow

A taste of death is what you get  
No escape and you screaming out your pain  
She smells your blood from miles away  
Her hungry smile will make you go insane

No one can resist her voice  
Fighting back in useless  
She wont listen if you pray

See her eyes and you know that she won't let you go  
She wants you to die she's the black widow  
Her look lets you know that she won't let you go  
She eats your heart out she's the black widow  
See her eyes and you know that she won't let you go  
She wants you to die she's the black widow  
Her look lets you know that she won't let you go  
She eats your heart out she's the black widow
